Changing the Mac address of a CCPC

When a Tell1 board is replaced, its information has to be changed in two places :

- The file `/group/online/tell1/quattor_ccpcs.csv` list all CCPCs and can be used to regenerate the quattor templates for a ccpc server and all its ccpcs.
- The quattor templates themselves : if only few ccpcs are changed, it is easier to modify directly the templates than to regenerate them (but please update the csv file so the next time we have to regenerate them, the generated templates are correct).

The basic rules to modify the quattor templates are there.
