LHCb Core Software Meeting

Date and Location

30 May 2007
10:30 - 10:45
CERN (2-R-030)

Attendees

Gerhard, Hubert, Marco Cl. (minutes), Olivier

Apologies

Gloria, Marco Ca., Philippe

Subjects

News

- next week is LHCb Week [↗](#)
- LCG 52a will soon be available (fixed a link issue in libRootAuth.so)

Software Releases

Gaudi (Hubert)

- Pre-release of Gaudi v19r4 available in the nightlies

DaVinci

- DaVinci v19r2 [🔗](#) released on Monday

Panoramix (Guy)

- Panoramix v15r4 is ready to be deployed

Round Table

Philippe

- An experiment at RAL is interested in Gaudi. Pere and Marco Cl. will have meeting with them.
- A problem was discovered in ROOT 5.14.00 d and e: the RootAuth plugin (used by the castor: protocol) has a dependency on globus through SSL. The work-around is to add globus in the StupProject command for applications depending on those versions of ROOT, but this is not optimal. ROOT have rebuilt a version f where the RootAuth plugin is statically linked to SSL. It will be included in an LCG 52a ASAP which we should pick up ASAP as well. B.t.w. this show that not many people in LHCb have received the message that one should use castor: rather than rfiio: (although castor: is he default at CERN in the bookkeeping...)
- HyperNews discussion started again on a couple of LHCb mailing lists. We should re-discuss it soon.

Hubert

Modified `getpack` to allow usage of the `anonymous` account with protocol `pserver`.
