LHCb Core Software Meeting

Date and Location

18 Feb 2009 [🔗](#)
10:35 - 11:35
CERN (2-R-030)

Attendees

Hubert, Juan (EVO), Karol, Marco Ca., Marco Cl. (minutes), Markus, Patrick (EVO)

Subjects

News

- LCGCMT 56 [↗](#) has been released.
- Workshop on Performance Tuning [↗](#) on 12-13 March.

Software Releases

Gaudi (Marco Cl.)

- No new development
- Started a couple of twiki pages:
 - ◆ Gaudi.UserGuide (test)
 - ◆ Gaudi.HowToMigrateToGaudi21

LHCb, Boole, Brunel (Marco Ca.)

- Impossible to override the implementation of CopyInputStream using the GaudiPatch package. The only way is to add a copy with a different name (LHCbCopyInputStream).
- Gerhard needs the fix to bug #46919 [↗](#). For the time being he will use a user project `Gaudi_v20r4`.

Marco Ca.: What about having a release of Gaudi with what is already there? Marco Cl.: There are still few major changes needed before being able to release a first v21. The current code could be released as v20r5. Let's decide next week (to be able to progress a bit on the changes).

Marco Cl.: preparing the release of SQLDDDB (with the simulation production tags). Marco Ca.: Alessia should provide a patch to have the Muon survey in DDDB.

HLT (Patrick)

- Getting Moore out.

DaVinci (Juan)

- Waiting for a working nightly to test.
- Fixed a bug in PhysDesktop. Needs fixes in LoKi that will not make it for the next release, but a work-around is possible in DaVinci.

Online (Markus)

- Ready to release as soon as LHCb is ready.

Marco Cl.: Can we try to have Carmen's package in the nightlies to test the build? Markus: OK.

Round Table

Karol

The problem with cvs run by acron on SLC5 is fixed. The platforms to be build are the 4: slc5_(ia32,amd64)_gcc(34,43).

Marco Ca.: we need to add a slot with Gaud v21 with the cmt extra tag GAUDI_V21, containing only Gaudi and LHCb.

Hubert

- ◇ New terminal server (cerntslhcb01) is ready (few tools missing). Karol will start to test the nightlies on it.
- ◇ AppConf v1r0 released. As a side comment, we should use JOBSEARCHPATH (which now works) instead of the environment variables to locate option files.
- ◇ Last fix to LbScripts, to be released as v2r5.

Marco Ca.: add Lbglimps to the project.

Marco Ca.

The migration of the HyperNews mailing lists to e-groups + SharePoint cannot be done before April because the experts are not available.
