# LHCb Core Software Meeting

## Date and Location

25-Sep-2013 [🔗](#)  
10:30 - 11:00  
CERN (2-R-030)

## Attendees

Ben Couturier, Illya Shapoval, Joel Closier (Vidyo), Liang Sun, Marco Cattaneo, Marco Clemencic (minutes), Markus Frank, Stefan Lohn

## Apologies

Gloria Corti

## Subjects

# News

- LCGCMT 66 built (not yet packaged)
- Gaudi v23r10 tagged and built (ready to be installed in release area)
  - ◆ supports slc5-gcc46, slc6-gcc46, slc6-gcc48 (using -Og for debug)
- LIM
  - ◆ discussion about JIRA: collecting feedback for a meeting with IT
  - ◆ from the next release of LCGCMT they will use the new build machinery (CMake-based)
    - ◇ prerequisite for the rpm packages
- Rehearsals for CHEP next week (no Core Software Meeting)

# Round Table

## Marco Cl.

- CMake
  - ◆ Geant4 builds with CMake (CMT compatible)
  - ◆ Gauss initial migration completed: to be tuned (issues with Pythia)
- Gaudi
  - ◆ v23r10 is a minor bugfix release
  - ◆ the next release will focus on the merge between the LHCb and ATLAS branches (will be tagged even if we are not building the LHCb stack on it)

## Joel

- First release of BeautyDirac in production

## Ben

- Issues with getpack and the french language

After a discussion on the various options, we agreed to set the `LANG` environment variable to `C` in few key places:

- LbScripts script baseclass
- gaudirun.py
- GaudiPython (module)

These should cover 99.9% of the use cases without interfering with the user desktop. Note that the changes in Gaudi will be in v23r10 after a retag.
