LHCb Core Software Meeting

Date and Location

2015-06-24 [📅](#)

10:30 - 11:00

CERN (2-R-030)

Attendees

Colas Pomies, Gloria Corti, Illya Shapoval, Joel Closier, Marco Cattaneo, Marco Clemencic (minutes)

Subjects

News

- Introducing Colas Pomies

Round Table

Marco Cl.

- Jenkins / Nightly Builds
 - ◆ moved git repository to gitlab (LBCORE-829)
 - ◆ upgraded server and plugins
 - ◆ re-organization of Jenkins' jobs
 - ◆ added priority lane for release jobs
- An ATLAS developer will help testing Gaudi for ATLAS
- Issue with Beat's script to push alignments and calibrations to Offline CondDB fixed yesterday, but there is another issue to be fixed (affecting a very improbable corner case)

Illya: checked the CondDB deployment. Yesterday there was a burst of updates.

Marco Cl. Beat added several runs in one go, after the fix.

Marco Cl.: Joel, can we access <http://eoslhcb.cern.ch> from outside CERN? If so, we should move the CondDB deployment files to EOS (instead of WEBAFS).

Marco Ca.

- Issue with LoKi dictionaries still present (lhcb-lcg-head used LCG 77 instead of dev4)
 - ◆ Marco Cl.: the issue was fixed yesterday, but I forgot that I changed lhcb-lcg-head. Will be fixed ASAP.
- Issue with a test in DetCond to be checked by Marco Cl.
- Strange problem with Muon calibration in Brunel tests
 - ◆ Marco Cl.: there was a retroactive change in a (new) LOMUON condition which should not affect the
 - ◆ Marco Ca.: is this change logged somewhere? NO. Can we know what changed in the new calibration conditions? In principle yes, but we need to introduce (automatic) tags to simplify the checks.

Gloria

- Problem with permission scheme used by LHCb Simulation: it seems that it was changed. Ben is following up.

Illya

- Increased the frequency of CondDB deployment cron. It cannot be reduced more than that (it currently takes ~7-8 minutes).
- Ben modified the deployment of CondDB to CVMFS to avoid empty transactions and increased the frequency too.
- Ariadne
 - ◆ moving to gitlab.cern.ch
 - ◆ introduce new type of node to track compatibility on Event Data Format
