

## DataCC < LHCb < TWiki

The data sits here on castor:

`/castor/cern.ch/lhcb/testbeam/lhcbvelo/acdc3`

There were 4 Cable configurations. All the files are time stamped so you can figure out which configuration the data files represent.

<b>date+time</b>	<b>cable configuration</b>
00.00 00:00	1
11.11 11:00	2
13.11 12:40	3
18.11 02:11	4

You can figure out the correct modules/tell1s for each config using HappyPionTable.
