

GaudiPythonTutorialUnits < LHCb < TWiki

The Gaudi framework has a system of units defined in c++ and python. These are in module GaudiKernel.SystemOfunits. Setup DaVinci and start python using:

```
SetupProject DaVinci  
python
```

Load the module and have a look around. What are the Gaudi units of length and energy?

```
from GaudiKernel import SystemOfUnits as units  
dir(units)  
help(units)
```
