

## List of productions candidates for cleaning

List of productions that are possible candidate for being cleaned (= removal of production from production system and removal of its output data from storage and catalogues). These are usually productions used for validations, or productions that were buggy and have been superseded.

Note: no production will be cleaned without previous approval from the application experts that requested the production.

### Reco12/Stripping17 validation

The following WG productions for Reco12-Stripping17

- 19142 (request 8257)
- 19144 (request 8256)

Waiting for green light before cleaning

### Several swimming productions

- ID: 5457, Name: Swimming Test D2KSPiPi Tagged 0x6D0032, currently stopped.
- ID: 7417, Name: Swimming D0-KPi Test Moore v12r5p1 MagDown, currently stopped
- ID: 7503, Name: Swimming D0-KPi Test Moore v12r5p2 MagDown

Waiting for green light before cleaning

### PreStripping18

- 17077-17092 (request 7431)

Set to Clean on 5/9/2012.

### PreReco13/Stripping18

(prompt reconstruction before new alignment, 5-10 April 2012)

- 17399 - 17413

this is currently in Archived. Probably by mistake. This should have been deleted together with the other productions of PreReco13 series (see [elog](#))

set to Clean on 5/09/2012.

### Validation of Reco13b / Stripping19b

- 18888 of request 8215 for Reco13b validation.
- 18897 - 18910 of request 8234 for Stripping19b validation

they are currently in status 'Stopped'. Already got the green light to remove them.

Set to Clean on 27/09/2012.

## Validation of Stripping19c on 2011 data

We did 2 validations for Reco13d/Stripping19c on 2011 data:

One very small pre-validation, on only one run (102153), whose output is under Bkk path  
/validation/Collision11/Beam3500GeV-VeloClosed-MagDown/Real Data/Reco13d/Stripping19c/90000000 ( Full stream )

- 19401 (from request 8409) for Reco13d
- 19420-19433 (from request 8427) for Stripping19c

Set to clean on 27/09/2012

and after that, we did the 'big validation' on 35 pb-1 (run range 102740-102811), for only BHADRON and BHADRONCOMPLETEEVENT, available under Bkk path  
/validation/Collision11/Beam3500GeV-VeloClosed-MagUp/Real Data/Reco13d/Stripping19c/90000000 ( Full stream )

- 19652 (request 8500)
- 19767-19769 (request 8543)

Set to clean on 28/09/2012

Later, another validation on 30 pb-1, still running at the moment of writing (3/09/2012)

- 20015 - 20017 (request 8653)

Set to clean on 28/09/2012

## Validation of Reco13d/Stripping19c for prompt reco on 2012 data

- 19400 (request 8408) Reco13d
- 19626-19639 (request 8491)

Set to clean 01/10/12

## Validation of Reco13e for prompt reco

- 19820 and 19821 (request 8567) both Reco13e

Set to clean 02/10/12

## CERN EOS validation

- 19874 (request 8601): data reconstruction prod. to test upload to EOS
- 19918-19931 (request 8605): stripping

Set to clean on 28/09/2012

## Reco14 validation for reprocessing

- 20020 (request 8690)

validation for the data reprocessing reconstruction

Set to clean on 03/10/2012

## Stripping20 validation for reprocessing

- 20118-20131 (request 8707)

Set to clean on 03/10/2012
