ranking problem: report from Roberto's email:

Just to remind that about the ranking problem and (more in general) about the flickering behavior of the Information System I've submitted a ticket GGUS #10172 that summarize the different problems that LHCb is observing since several months from now about crazy info providers, CEs overloaded, routing queues(?). The problem has to be sorted with very high priority by LCG/gLite people. -- AngeloCarbone - 12 Jul 2006
