

# OT Event Model

(info provided by Jacopo Nardulli)

## Under Construction

Concerning the Review of the OT Event Model, we had big modifications last year. A note is now public, so in order to understand the differences between the Old Event Model and the now one is possible to see the differences between the old OT Software (Note 2003-062 [↗](#)) and the new OT Evend Model (Note 2005-004 [↗](#)). The OTDAQ data format is fully described in Note 2004-033 [↗](#), while the OT Level 1 data format is described in Note 2005-031 [↗](#). Today I also made public a note about the Level 1 Software Integration (Note 2005-043 [↗](#)).

Short cuts to the DOXYGEN documentation:
