

## Issues related to the "Offline" software and its environment

These are mostly problems found when running MooreOnline and EulerOnline, the HLT and L1 applications in the online environment, as well as a few minor issues with data format, as provided from the simulation.

### Missing TELL1 banks in the Raw and L1Buffer

When producing the MepFiles for the RTTC it has been noticed that from the VELO (L1) and the RICH (HLT) sometimes banks are missing. This is a violation of the rule, that every application always must send a bank, if necessary empty.

**Solution:** The responsables have been notified

### Weird numbering of MUON TELL1s

MUON raw source id code the parity of the number of hits in the TELL1 in the srcid of the bank they produce. This can be quite confusing and is IMHO an ugly hack.

**Solution:** The responsables have been asked to change this behaviour -- NikoNeufeld - 18 Jul 2005
