Step by step manual to run the HLT in DaVinci

This has been written for DaVinci v25r5. The intention is that you are able to run the trigger in DaVinci by following precisely the instructions given here.

First you need to check out some scripts (on lxplus):

```
getpack Hlt/Hlt2CommissioningScripts
(chose the head version)
SetupProject DaVinci
cd Hlt/Hlt2CommissioningScripts/python
python RunHltInDaVinci.py
```

Voila, you should have the HLT running. As next steps, you can think about what threshold settings you used and understand the script you called using these explanations.
