

Running the DIRAC benchmark is very easy:

```
$ SetupProject LHCbDirac
$ dirac-wms-cpu-normalization
  Normalization for current CPU is 9.5 HS06
```

This figure should match the value provided by CERN it in:

```
[lxplus310] ~ $ more /etc/machinefeatures/hs06
70.17
[lxplus310] ~ $ more /etc/machinefeatures/phys_cores
8
```
