# List of terminals

- terminal02 — `G:\online/ecs\Shortcuts\INFDAI\INFDAI1_UI_lbCrateMain.lnk`
- terminal03 — INFDAI1_WIN?
- terminal04 — `G:\online\ecs\Shortcuts\ECS\ECS_ALARMScreen.lnk`

Naming convention: `terminal01, termina02, ..., terminalNN`

# Fujitsu-Siemens

**OS:** eLux Manual☞

## DHCP configuration

DHCP configuration is stored at the file `/etc/dhcpd.terminal` on `dns-sx-01`.

## Installation

For basics of installation see eLux Manual☞

## PVSS panel

For example we have PVSS shortcut to PVSS panel `G:\online\ecs\Shortcuts\ECS\ECS_ALARMScreen.lnk` and you would like to see this panel on UI01 server:

1. **UI01**. Create file `C:\Terminal_ALARMScreen.bat` on with the following content:

   ```
   NET USE G: \\nfs01\group
   NET USE P: \\nfs01\sw
   start G:\online\ecs\Shortcuts\ECS\ECS_ALARMScreen.lnk
   ```

2. **Terminal**. Start->Starter->Configuration (tab)->New(button)->RDP(tab).
   - ◆ Name: UI01;
   - ◆ Server: UI01;
   - ◆ Application: C:\Terminal_ALARMScreen.bat;
   - ◆ User: lhcb_oper;
   - ◆ Password: *password*;
   - ◆ Domain: lhcb;
   - ◆ Check "Start automaticaly after 0s";
   - ◆ Advanced settings (button)-> Display (tab) -> select "Full screen" and "True color".
3. **Terminal**. To secure configuration you should check permissions at Start->Starter->Setup(tab)->Security(tab)->Local security (fieldset)->Edit(tab)
4. **UI01**. For target server you need disable screen saver and password protection (or setup a big delay for screen saver appearance): Start->Setting->Control Panel->Display->Screen Saver. Set "Screen Saver" to "None" or setup "Wait" and uncheck "On resume, password protect".

## Panel shown but inactive

When the project the console is connected to is restarted, the console loose the connection and has to be restarted. As the panel is inactive, nothing can be done on the console (power off/on on the console will make it reconnect to the same bad session). You have to connect on UI01, and logoff the "lhcb_oper" session corresponding to the terminal that has the problem. You can then restart the console (or the connection on the console).
