

## AmmonHarel JetIDUsage < Main < TWiki

Until we have everything 100% official and released... (note, ~aharel refers to my LPC area at cmslpc.fnal.gov)

```
cmsrel CMSSW_3_1_2
cd CMSSW_3_1_2/src
cmsenv
addpkg RecoJets/JetAlgorithms
cvs up -A -d RecoJets/JetAlgorithms
mkdir RecoJets/JetAlgorithms/python
cp -p ~aharel/test/jetProducer_cfi.py PhysicsTools/PatAlgos/python/producersLayer1
addpkg PhysicsTools/PatUtils
cp -p ~aharel/test/JetIDSelectionFunctor.h PhysicsTools/PatUtils/interface/
scram b -j4
```

Note: Not sure what's the best place for these configs. I'd like to have something like `cp -p ~aharel/test/JetIDHelper_cfi.py RecoJets/JetAlgorithms/python`, but that looks very different than how the rest of `jetProducer_cfi.py` is written.
