

## Class 1 shifts

Information on the next class 1 shift training can be found [here](#).

We are currently(2016) trained for doing the DataQuality shifts (Alan,Flavia,Hasib,Liza).

## Class 2 shifts

Popular:

Reco & Software Shifts: RecoAndSimShifts (can be done in Edinburgh)

- requires no training. A brief session with an experienced shifter or the shift coordinator (Luis March) is recommended prior to starting.
- short (~2h/day)

Simulation & Digitization Shifts: SimulationDigitizationNightlyValidation (can be done in Edinburgh)

- longer, with more tasks to do

## General shifts information

To sign up for shifts go to: [atlas-otp.cern.ch](http://atlas-otp.cern.ch) There's more specific information on the pages above as to sign up for those particular shifts.

## Edinburgh 2014 Shift Status

The Edinburgh OTP requirement for 2014 is 4.94 FTE

## Edinburgh 2013 Shift Status

The Edinburgh OTP requirement for 2013 is 3.72 FTE. Adding in the 0.16 FTE offset from 2012, and dividing this equally among the members listed below (authors, or those seeking authorship), this works out as 0.194 FTE per person. Therefore everyone's target should be to obtain around 0.2 FTE in Class 2 and Class 3 contributions during 2013.

- The units for class 2 shifts are 8h working days.
- The units for class 3 shifts is FTE.
- ATLAS has 243 working days per year.
- In the table below I've used a conversion factor of 1/250 to convert from working days to FTE, which is a slight underestimate.

Last year the sum of the people below covered 3.6 FTE in Class 3 contributions. If we keep doing Class 3 at this rate, we don't need to do many Class 2 contributions.

If you are doing less than 0.1 FTE in Class 3 contributions this year, please try to do around 14 units of Class 2 shifts this year.

Please edit the table below to show what class 2 shifts and class 3 contributions you have done, or plan to do, during 2013.
