Framework e produzione

Stefano : no news

Attivita' di analisi

B physics

Stefano : commenti language editor P5' , niente de che. Yield 2016 40 fb 1600/1700 eventi (stima cinesi, erano attesi 2200). Alessio ha chiesto conferenza a Praga e ha ottenuto un poster, a EPS forse unito con B->mu mu. Nel caso Stefano fa step down.

Dark Matter

nobody attending

Dibosoni, VZ risonante (V=W,Z)

nobody attending

hh4b non risonante

discussion with conveners after preapproval. Aiming at EPS, otherwise later conferences. Tommaso has a talk in EPS for our background estimation method.

Same sign leptons

Seesaw a 13 TeV

Ezio : the paper is circulating . One set of comments has arrived, but niente de che. Carla has been added to the author list.

EPR

Isolamento muoni

Flavor tagging

Trigger

Manpower issue.

Detector

Longevity meeting : results are consistent but difficult to interpret. Looking for polluting materials (so far: I, the oring and something in the front end, not yet identified). Gas circuit will be split : 24 MB1 chambers exposed to a larger radiation damage will be dealt with on their own. Looking for ageing test on the chambers in the detector. No alarm in CMS , but there might trigger issues in the forward region (theta~45 degrees), where MB1 triggers alone. Tracking trigger might help, except for out of time muons from HSCP. A presentation in 20-30 months.

A.O.B.:
