Act i on I t ems:

News:

Framework e produzione

FF No special news. Start production for B physics this afternoon.

Attività di analisi

B physics

MM: final reading form P5'. SL: no serious items, discussion about the title, should be ready by end of this week.

Dark Matter

Di bosoni, VZ risonante ($V=W, Z$)

PL: comments in CWR, correction done by today.

hh4b non risonante

TD: repair for bias on background correction. Asked a closure test on control sample. Done on a not-b tag sample, there the correction removes any bias, pull widths =1. Will present this stuff next week. Some statistical subtleties are still present. AT: I checked an intermediate sample, after mixing selection is changed (limits on max B-tag vary), this inefficiency needs to be removed.

Same sign leptons

Seesaw a 13 TeV

EPR

Flavor tagging

P : going through interaction with people. TD : your work is not quoted ?
P: I did not check if I was an author.

Tr i gger

Detector

Shifts at GfF++, you are welcome.

A. Q. B. :

October 10-13 Trevor Hastings in Padova (a main head in Machine Learning) in the Statistics department. Seminars this year and next one.
