# User Support news for Offline and Computing management

## Goal of this page

This page lists the news sent regularly to the CMS Offline and Computing management.

## Introduction

It is important that the information flow between the User Support and Computing and Offline managements works properly: the User Support team regularly reports to the management what is going on and what is planned. Rather than organizing regular meetings, the information is provided in these pages. Issues for which feed-back is expected are marked with red. If needed, any of the items can be discussed in the joint computing and offline meetings on Wednesday afternoon, and special User Support meetings to discuss some specific issues can be called during the computing meetings slot on Thursday afternoon whenever necessary.
