

This page should be of some help in locating data for a specific run. Unfortunately most of my knowledge is hopelessly out of date and may be wrong!

Find data using the RunSummary [↗](#) tool on the CMS WBM [↗](#) page.

Data is now kept locally in EOS, at least during the 2015 pre-run commissioning.

Documentation on EOS:

- [Quick Tutorial](#) [↗](#)
- [Documentation](#) [↗](#) on eos.cern.ch

Before using eos, execute

```
% source /afs/cern.ch/project/eos/installation/cms/etc/setup.sh
```

Then you can do e.g.:

```
% eos ls -l /eos/cms/store/data/Commissioning2015/Cosmics/RAW/v1/000/235/788/00000
```

The old DBS database seems to have gone away. Need to find out what the replacement is.
