

- 29-Feb Reverted back to 'Forking' search algorithm
- 04-Feb Enabled Native search
- CERNsearchStats
- Week12Week132009

egrep is TWiki's search. Grep search is done in batches of 512 files at a time.

There are certain actions that can generate a high system load if you have 50K+ pages, such as an all webs search, a topic rename checking for backlinks, or looking at the complete history of a file with 100+ revisions.
