larmon account cleaning

This page is meant to collect all informations to clean the messy larmon account during LS1.

Ideally, one would like to have all relevant scripts in the LArMonitoring package [↗](#) and not widespread in all the account as it is now. The larmonitoring package is checked out on larmon account in ~larmon/public/LArCalorimeter/LArMonitoring. All scripts are supposed to be moved here and then deleted from their former location

The documentation on the server stuff can be found here [↗](#)

Crucial facilities to be preserved

Facility	Current location in larmon account	Storage in LArMonitoring	Dev	Migration Status	AOB
WeeklyReport : extract all inefficiencies from defect useful for weekly/yearly report	Removed	python/LADIEs	Benjamin	Done	
WDE : WebdisplayExtractor			Christopher		
LArIDTranslator	public/LArIdTranslator	python/LArIdTranslator	??		
HV Trip database	public/HVTripsDB??	python/HVTripsDB	Operation team		3 dir exists too public : nothing _new, _test - I public/TripViz directory relat
UPDTools: extarction of nb of channels flagged	public/script/LADIEs	python/LADIEs/UPDTools.exe	Pavol / Walter		New linux exe execute python stored in larca
LArPage 1	public/LArPage1	python LArPage1	Olivier D.	Dir simply copied - No change yet	
LCE infrastructure					

Important note for services using xmlrpc communication (WDE, LArPage1, WeeklyReport...): the new password generated for 1 year is now hidden in ~larmon/passfile.txt

To retrieve it, one should use the following typical sequence:

```
passfile = open("/afs/cern.ch/user/l/larmon/passfile.txt"); passwd = passfile.read().strip(); passfile.close(); s = xmlrpclib.ServerProxy('https://%s@atlasdqm.cern.ch'%(passwd))
```

I tried to update it for LAr Page 1. Not for WDE.

Major updates:
