

## Useful CASTOR commands

### What's CASTOR

### Commands

In addition to your lxplus account, you also have space in CASTOR. The path to this area is defined by the environment variable **CASTOR\_HOME**

```
<lxplus063> echo $CASTOR_HOME  
/castor/cern.ch/user/a/aosorio
```

The following commands are the basic file handling operation:

- **rmdir** *dir*: list the contents of *dir* located in your CASTOR area
- **rfmkdir** *dir*: to create a new directory
- **rfcp** *source target* : copy *source* into *target*
- **rfrm** *file* : deletes *file*

## File transfer to/from CASTOR outside CERN
