

QueryForMETfromParticleInSUSYSamples < Main < TWiki

Reminder- to get the METfromParticle in SUSY samples do not forget to vectorially add the neutralino Pt. The relevant query from Haifeng since ORCA_8_7_1 is

```
RecQuery RecQuery3("METfromParticle","1.0");
```

```
RecQuery3.setParameter("UseNeutralino", true);
```

If you have private SUSY sample generation there are appropriate writeDST.orcarc cards for the query to work- [if not used then your job will crash if you try to use the above query]
