

List of tasks - Immediate

- Identify the different measurements and relevant inputs
 - ◆ existing "DQ flags"
 - ◆ other informations, not quantified, as "flags" yet
- Review existing monitoring histograms
 - ◆ extract the relevant ones
 - ◆ define missing ones from a physics point of view
- Review the meaning of the DQ flags
 - ◆ existing ones
 - ◆ foreseen virtual

List of tasks - Longer term

- digest information from monitoring and additional histograms
 - ◆ calculate first-order corrections from relevant histograms
- define recipe for physics data quality flag
 - ◆ basic ingredients: DQ flags from CP groups, online DQ from detectors
 - ◆ envision possibility of loosening / tightening requests as necessary
- prepare GoodRunList for each analysis chain according to physics flag

Contact people

Egamma	Corinne Goy
Mion	Alberto Belloni
Tau	Susie Bedikian
MET/Jets	Xim Poveda (interested)
Trigger	Ellie Dobson
Luminosity	Davide Caforio (interested)

Other

- Define a technical implementations of the "Physics flag"
- Closer contact with DQ community
 - ◆ we will attend the weekly DQ meeting; we could define a person to act as liaison between DQ/Physics and DQ group
