Plan to retire myproxy-fts.cern.ch service

Now that all WLCG FTS services are running 2.* and all clients are using delegation, we would like to retire the older myproxy-fts.cern.ch service.

The majority of remaining users seem to be monitoring clients.

Planned date is as soon as the WLCG experiments agree.

Maarten: One final user - the SAM Nagios tests. Non blocking, but must wait for ops manager to return from holiday (17 May) to reconfigure the SAM Nagios to use the standard myproxy.cern.ch service. [Agreed 20 May]

Proposed date for retiral

8 July 2010.
