Minutes 19 October 06

- Phone:
 - ◆ **TRIUMF:** Denise
 - ◆ **GridKA:** Andreas
 - ◆ **FNAL:** Eric, Lee, Dave
 - ◆ **ATLAS:** Shasha
 - ◆ **CNAF:** Barbara
- CERN:
 - ◆ **3D:** Dirk, Zbigniew, Luis, Eva
 - ◆ **ATLAS:** Gancho, Florbela
 - ◆ **CORAL:** Ioannis, Radovan
 - ◆ **Oxford:** Stefan
 - ◆ **AMGA:** Birger
- Tier1 site status:
 - ◆ Triumf (Denise): running performance tests on the SATA disks, hw mirroring, ASM.
 - ◆ CNAF (Barbara): working on the LFC LHCb work plan
 - ◆ GridKA (Andreas): I/O problem observed: one node is very busy. Doris has sent an email to Dirk. We will need an account on the database and contact the dbas for help.
- TCP tuning for Streams (Dirk D.):
 - ◆ Slides uploaded to the agenda
 - ◆ Motivation: slow transfers to BNL and Taiwan due to the network latency
 - ◆ Luca has run tests on tuning the application but they are not valid for Streams
 - ◆ Proposal: increase the TCP buffer size, apply this change consistently to all the sources and destinations using Streams
 - ◆ Florbela has run some tests using Oracle Net parameters
 - ◆ Eva will change the TCP buffer size on INTR and Florbela will repeat the tests changing the Oracle Net buffer size.
- ATLAS COOL tests:
 - ◆ Capture process on integration got stuck. It was recreated but without using the last SCN already applied at the destinations so now there is a gap on the data
 - ◆ Eva propose to create a new capture process to re-capture the changes in the gap, it is necessary to determine the SCNs to start and stop the new capture
 - ◆ Wait event observed on the apply site: it is related to poor performance on RAC environments. To be investigated!
 - ◆ Problem with OEM, mail already sent to Dirk G.
- CMS Frontier tests:
 - ◆ Segmentation fault problem: correlated to the second thread, Seal sw
 - ◆ Workaround: disable second thread. This will be better than request a bug fix on the Seal sw (it will take longer)
 - ◆ There is another issue logged in Savannah
 - ◆ Basically all Tier2 sites are already in the test
