Minutes 29 September 05

General issues

- Discussion on Streams users privileges (recommendation from Anil Kumar): dba privileges Streams administrator is a requirement
- BNL would like to participate in the 3D Distributed database testbed. Iris Wu is the person in charge. She will use Grace account to download binaries and Streams configuration scripts.
- meetings on Streams tests more frequent - every week
- plan to upgrade to 10gR2 beginning next year
- start to check Streams configuration on 10gR2 (Eva)

COOL and TAGS slice test

- first tests using COOL at CERN (Andrea Valassi is preparing the COOL account scripts)
- setup the two replica nodes at CERN during next week (Eva)
- after CERN tests will continue adding T1
- Stefan looks at ATLAS software for streams tests
- Atlas geometry application will be use: no so much data, update monthly
- TAGS package is not ready yet

POOL Frontier plugin/monitoring plugin

- There was a discussion on how to help Lee and his colleagues validate the Frontier plugin for RAL and how to develop a monitoring service.
- For the validation of the Frontier plugin the POOL team will make an internal release of POOL with the plugin included.
- For the development of the monitoring service, the latest internal release of Persistency should be used and configured as an external tool for CMS.
- For the implementation of the monitoring service, the existing simple one can be used as an example.
