

F. Gerigk, S. Ramberger, R. Wegner, G. DeMichele , P. Tirado and M. Schuh

SPL

- SPL cavity workgroup meeting [↗](#)
- Meeting with ESS [↗](#)

Buncher cavity

- Simulation model of 2 ramping cavities ready
 - ◆ ramping possible, but klystron in saturation
- Model of power dissipation in buncher cavity in work

SM18

- Replaced Klystron broken, another klystron needed for HP test, meeting with O. Brunner on Monday

Linac4

- Moveable tuner technical spec under preparation.

DTL

- Remachine end cone of low energy end done
- Analyze and preparation of drift tube from Bilbao started

PIMS

- Finished simulation on module 2
- Started simulation on module 10
 - ◆ used linear interpolation for starting point
 - ◆ frequency error of 300kHz

HOM

- HOM IPAC10 poster
