

# HC tests monitor for the RussianDataLake project

## Description

The monitoring of PanDA jobs submitted using the HammerCloud testing system is available [here](#). To access the page an active certificate installed to a browser is required.

To see results of a particular HC test, provide the hctestid in the URL manually:

<https://v025.pnpi.nw.ru/tests/?hctestid=X> or use the search box in the top bar on the monitoring page.

For more information look at the help section in the bottom of the monitoring page.

## Examples

*to be filled*

## Technical details

The instance of the monitoring is on v025.pnpi.nw.ru node. It is the Django-based application, deployed using uWSGI and NGINX. The source of data is the ElasticSearch, where the data from the BigPanDA API is accumulated.
