- Test 4
- Test 5
- Test 6
- Test 7
- Test 8: Had the save error... used the back history... tried again... got the error again... and again... and again... and finally saved properly.
- Test 9
- Test 10: got the error again... (my back history had 7 "Working..." listed in it before listing the edit page)... trying to save again... worked.

Second round of tests (2015-01-26)

- Test 19
- Test 20: Interesting, when I clicked the edit button this time, I saw my browser move through the SSO URL between me clicking the 'edit' button and then seeing the edit page. So now my Back History shows a page listed as "Working...", which was not the case until this last edit attempt. Though, I did not receive the error so the latest fix appears to have worked..... OH! I spoke too soon. I just saw the error again... went back to the edit page... trying to save again.
- Test 21

PJ

TWiki session `view`, `edit`, and `save` using . W7, Firefox.
