

Question

With the update to TWiki version 4.3.1, the background colors of a table I put together to resemble a calendar no longer appear.

The page is here: <https://twiki.cern.ch/twiki/bin/viewauth//CMS/FNALROCDQMShiftList>

The background colors were an important part of the the table.

Here is a snip-it, in case you cannot view the above page.

Thanks.

Answer

▲ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

Following tests the `datavg` color that is set in the `TABLE` definition overrides the `bgcolor` in each `td` setting. I removed `datavg` and got the required results. Please try this out
