

## Question

I was trying to limit access to my personal area (<https://twiki.cern.ch/twiki/bin/view/Main/PhillipHamnett>) to only atlas-current-physicists. I typed the following command:

```
<!--
```

- Set ALLOWTOPICCHANGE = AtlasCurrentPhysicists

```
-->
```

The result is that I now can not edit my own page anymore because I accidently created a new group and not the actual atlas current physicists group.

Can an admin fix this edit mistake for me and point me to the correct naming scheme for an egroup?

Cheers, Phill

## Environment

Web Browser:	firefox
User Location:	External

## Answer

**⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.**

The group that you specify in the ACL does not exist. The ACL has ben removed and you shoudl have access now
