

Question

How to fill a form option list with a Search Result?

I want to have a selection in the form based on a list resulting from a search.

Example:

A topic with the form: <https://twiki.cern.ch/twiki/bin/view/CAE/Internal/Item9>

List definition for the form at the bottom of:

<https://twiki.cern.ch/twiki/bin/view/CAE/Internal/ProjAppliesToApplication>

Environment

Web Browser:	IE
User Location:	Internal
Categories:	Forms

Answer

⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

You can use a SEARCH like the one used in WebHome `Select by category`
