Question

Hi,

I am asked to get statistics about pages I am managing under the EGEE web, at https://twiki.cern.ch/twiki/bin/view/EGEE/VOSupport

Problem is that I didn't succeed in getting only my subpages statistics, I only accessed full web stats.

Would you now how to do that ? I've tried seom combinations of varibales like this %{VAR_NAME (i don't remember the name) pattern=".*"}, but this didn't work and raised errors...

Thanks

Answer

⚠ **If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.**

The statistics are collected per web and are presented in the WebStatistics pages. You can extract data from this page with a formatted search
