

Question

How can I display image on the middle (width) of the screen?

Environment

Web Browser:	Chromium
User Location:	External
Categories:	Browser Issue

Answer

▲ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

Check the options in ImagePlugin.

Otherwise you can use the parameters in the html `img` tag or style the area containing the image

```
<div style="text-align: center;">  
<img...  
</div>
```
