

## Question

Hi,

I have written a twiki page on the SandBox (<https://twiki.cern.ch/twiki/bin/view/Sandbox/GammaPi0SeparationResamplingTool>) and now that everything works properly and things are ready to be released, I would like to move this page out of the Sandbox.

My idea is to move it under <https://twiki.cern.ch/twiki/bin/viewauth/LHCbPhysics/> since my twiki page is about a tool that can be used for the separation between photons and neutral pions.

I have tried to do 'more actions on topic' and then 'rename of move topic' but the LHCbPhysics folder is not one of the possible destinations.

Can anyone tell me how to do this? I have been trying to find a solution but I have been unable to do so

Cheers,

Vicente Rives

## Answer

**⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.**

Hello It was probably a permissions issue and the LHCbPhysics web wasnt shown for this reason. I see however that there is a topic with this name already in LHCbPhysics.
