

## Question

Hi, for my reports I need the number of hits for a single TWiki page, if possible for a given period (quarter of a year or one month). How can I get this number of requests for a page?

Thanks, Torsten

The WebStatistics topic may help, each web has one. You can take fields from this topic for the last month with a search something like

```
%INCLUDE{"%STATISTICSTOPIC%" pattern=".*?\-\-statTopContributors\-\-\>[\r\n]+[\r\n]+\|[\^|]+\|[\r\n]+
```
