

Question

Hi,

I'm trying to use parametrized variables but it doesn't seem to work.

This is what doesn't work for me:

- Set Var = bla %par%

```
%Var{ par="blabla" }%
```

I get back this: bla blabla

but I expect this: bla blabla

Is it possible that our version of twiki does not support this?

Thanks and cheers,

Zoltan

Hi, I understood that the Parametrized Variables (Macros) have been introduced in TWiki 5.1 but CERN is running TWiki 4.3. Cheers, Zoltan
