

## Question

I would like to allow viewing access for anyone (without need to register). I tried the setting

- Set DENYTOPIC =

but it still seems to require authentication.

Modification should only be allowed to only registered users.

Can you help me?

## Environment

Web Browser:	
User Location:	Internal
Categories:	Permissions

## Answer

**⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.**

The setting should be DENYTOPICVIEW . See TWikiAccessControl
