

Question

Dear Twiki developers

I was trying to look up <https://twiki.cern.ch/twiki/bin/view/CMS/TriggerResultsFilter>

by typing "TriggerResultsFilter" in the top right search box. It only gave 4 hits and none of them was right.

I finally found the page by searching on "Trigger" and digging in suggested Twikipages and finally found a link to the right page.

As you can see, the word "TriggerResultsFilter" appears 8 times on that webpage. How is it possible that it is not found by the search engine? Is it possible to improve the search engine?

Thanks a lot Kind regards Piet Verwilligen

Answer

⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

There was an incorrect version of the document indexed which has been corrected now.
