

Question

It would be useful, if one could collapse/expand a block of text on TWiki pages, similar to what is done for hiding or showing the list of attachments.

I viewed the html code of a page with attachments. The tools to hide/show attachments are very much linked to attachments and cannot (easily?) be transferred to any text block.

Thanks for information whether any plugin or add-ons exist which could be used.

Environment

Web Browser:	Firefox
User Location:	Internal
Categories:	Add-Ons, Missing functionality, Plugins

Answer

⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

This is done with the TwistyPlugin

There are some examples in the above page.
