

## Question

Hello I have a problem with a twiki table (see below) that does not visualize correctly (the 5th column disappears after the first row)

| Date | Id | Requester  | Sample description | Binned         | Total # of evts | Cross section | Total eff. | cfg | time per event (s) | size per event | Additional Notes |

The code looks ok, the < may confuse the table though. Did you have a topic that contains this example?
