

Question

The Twikis here have an XHTML DTD but they are neither well-formed nor valid. Can this be fixed? I am trying to read data from a TWiki to compare with a database, but XML parsing is not currently possible.

Environment

Web Browser:	
User Location:	Internal
Categories:	General Usage

Answer

⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

The CSS style sheets and html templates are inherited the twiki.org which also shows the problem. We can push twiki.org to fix the code.
