

Question

Hello, I just created the topic

<https://twiki.cern.ch/twiki/bin/view/Main/Absences>

Intending to restrict its view access, I entered the authorized cern e-group "hephy-cms-trigger" as variable of the "Set ALLOWTOPICVIEW", but in an obviously wrong format for the system. Being a member of this group, I now cannot access (nor edit!) this topic myself any longer. Could you fix this for me please? Many thanks, Claudia

Answer

⚠ If you answer a question - or have a question you asked answered by someone - please remember to edit the page and set the status to answered. The status is in a drop-down list below the edit box.

You cannot use email addresses in ACLs, only TWikiNames, TWikiGroups or egroups can be used . I corrected the line. Please try again
