

Question

Dear Twiki support team,

I am in charged on maintaining and updating the Top Monte Carlo twikis for the ATLAS experiment. In particular this twiki and all its daughters:

<https://twiki.cern.ch/twiki/bin/viewauth/AtlasProtected/TopMC12>

Also this one: <https://twiki.cern.ch/twiki/bin/viewauth/AtlasProtected/TopMCDSIDs>

Right now, I have several scripts that produce the text that I should copy and paste by hand into the twikis. I was wondering if it would be a way yo access and edit the twikis from the lxplus command line. This feature would be extremely useful to maintain/update all the information related to the large Monte Carlo production done in ATLAS.

Best Regards,

Carlos

Hello The TWiki backed isnt accessible from lxplus, it is stored in a secure NFS mounted device and access is only possible from teh TWiki browser or by the system admin on the machine that mounts the drive. So at present this is not possible

Ok, thanks. Is there any plan to enable this feature in the near future?
