About TOTEM TWiki and TWiki in general

The TOTEM TWiki is a section of the web of the TOTEM experiment [at CERN](#), managed with the TWiki technology. TWiki enables you to create web pages and edit them through a web interface, using implicit linking by page name through WikiWords [a simplified formatting markup](#), [and other goodies](#). It is particularly suitable for collaborative documentation projects. For example, the Offline Workbook of Atlas is being constructed using this technology.
