CernUserTopicPlugin

CernUserTopicPlugin redirects any request to a user topic to a special page where the user has the chance of going to the Phonebook, or to the actual user topic.

Exceptions:

- If you click on your own user topic, and this exists, you go there directly.
- If you click on your own user topic, and this does not exist, you get the opportunity to create it.

CernUserTopicPlugin makes sure that you cannot create a topic in the Main web where the topic name equals a WikiName which is not your own. These topic names are reserved and can only be created by the CERN login owning the WikiName that equals the topic name.
