

ForceNewRevision < TWiki < TWiki

Normally, if you make subsequent edits within a one hour period (configuration item `{ReplaceIfEditedAgainWithin}`), TWiki will fold together your changes. This is often the "right thing to do", as it can reduce the visual clutter of the topic history.

The "Force new revision" checkbox is a way to force it to create a separate revision each time you save.

The TWiki.TWikiPreferences variable `FORCENEWREVISIONCHECKBOX` controls whether this is checked by default or not.

On a related note, you can force *every* save to be a new revision number by setting `{ReplaceIfEditedAgainWithin}` to 0.
