

---+ Package TWiki::UI::Upload

UI delegate for attachment management functions

## StaticMethod attach (\$session)

attach command handler. This method is designed to be invoked via the UI::run method.

Generates a prompt page for adding an attachment.

## StaticMethod upload (\$session)

upload command handler. This method is designed to be invoked via the UI::run method. CGI parameters, passed in \$query:

hidefile	if defined, will not show file in attachment table
filepath	
filepath1	
filepath2    upto   filepath9    upto	
filename	
filecomment	comment to associate with file in attachment table
createlink	if defined, will create a link to file at end of topic
changeproperties	
redirectto	URL to redirect to after upload. {AllowRedirectUrl} must be enabled in configure. The parameter value can be a TopicName, a Web.TopicName, or a URL. Redirect to a URL only works if it is enabled in configure.

Does the work of uploading a file to a topic. Designed to be useable for a crude RPC (it will redirect to the 'view' script unless the 'noredirect' parameter is specified, in which case it will print a message to STDOUT, starting with 'OK' on success and 'ERROR' on failure.

Your form should be defined similar to following: ....
